

# Enhancing Digital Education for Tomorrow's Leaders

EverFi partners with educators across North America to teach, assess, and certify students in the critical skills they need to be successful in life. Our co-curricular, digital courses deliver content that engages 21st century learners by leveraging gamification, simulations and assessments. These learning courses provide meaningful metrics to teachers by not only measuring knowledge gains, but also student attitudes on these important topics. One of the benefits to partnering with EverFi is that K-12 public schools can access our learning courses for free, thanks to our partnerships with companies and foundations.

# Your Blended Learning Partner

## *Dedicated Teacher Support*

EverFi has an implementation team, many of whom are former teachers, located across North America to manage trainings and provide personalized support. Our dedicated team allows teachers to feel as though they have a blended learning assistant in their classroom.

## *Measurable Outcomes*

Assessments and surveys provide visibility into student knowledge gains and changes in attitudes and behaviors. Teachers can track student progress and differentiate instruction based on student outcomes.

## *Ready to Get Started?*

Implementation is customized based on each teacher's individual needs. Teachers can watch a brief video that provides detailed course and registration information, or they can participate in a 20-30 minute training session led by the EverFi implementation team. Contact your schools manager to get started.
